

Welcome!

This Pyramid Creates the Universal Beneficial Biofield as a beam out of the center of the base of the pyramid, and extending downwards. Usually this is where the Unhealthy Biofield is created in currently popular pyramid shapes. This Biofield will not create mummification, rather It will contribute to life.

This Pyramid shape (.STL file) Can be 3D printed with an online 3D printing service, and a silicone mold made at home, or an online silicone mold service can make it.

Once you have your Pyramid Silicone mold created, you can cast this Beneficial Shape Again and Again, making more Universally Beneficial Biofield Generators.

The Pyramid should Be placed ABOVE the Object or space or gridline that you want to imprint the Universally Beneficial Biofield Into, since the biofield "shines" out of the bottom of the pyramid.

The Pyramid itself does not radiate the beneficial biofield in all directions, it is a biofield prism.
